

**CONRAD 133**

## CONRAD 133

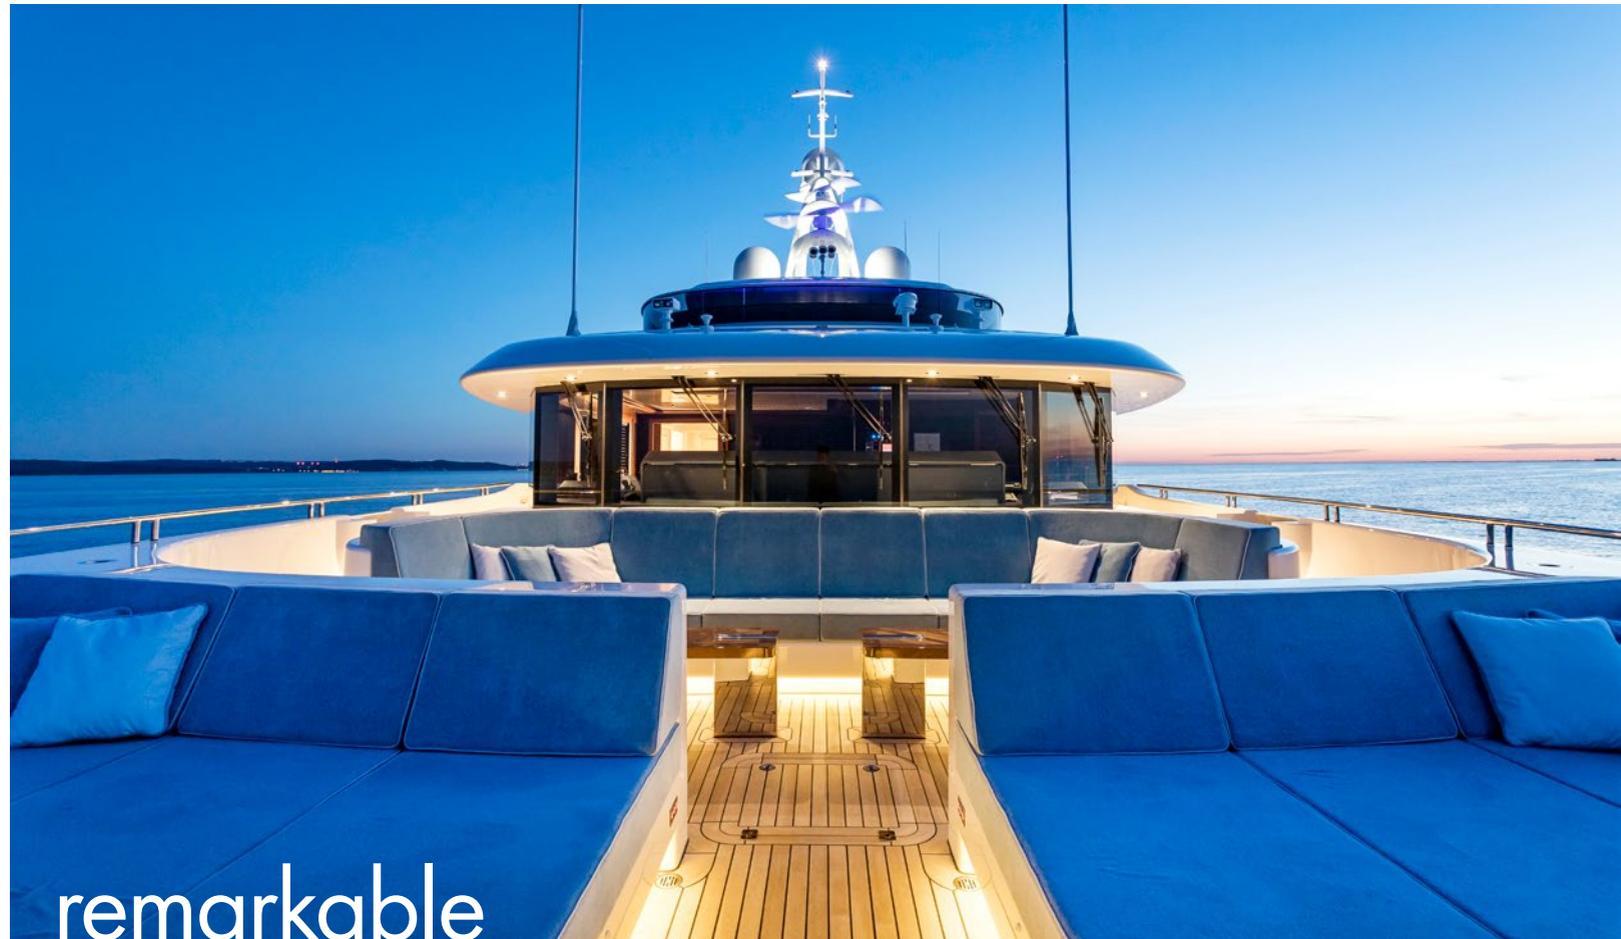

Reymond Langton Design was commissioned by Conrad Shipyard to create this graceful 40-meter luxury motor yacht for an experienced yachtsman and repeat client of the yard. The design brief was for an elegant, yet aggressive vessel that has modern and unique lines, which will remain timelessly stylish. Built to the highest Northern European standards, she features finest luxury interiors and a layout with elements of a much larger yacht. Conrad Shipyard is pleased to announce that this harmonious marriage between the prestigious design by Britain's Reymond Langton and proven naval architecture by Diana Yacht Design of the Netherlands, in partnership with Conrad Shipyard's world-class Polish engineering and craftsmanship, is now offered as a semi-custom model.

With a focus on safety, quality, and efficiency, this full-displacement luxury motor yacht was engineered to meet the most demanding technical and safety standards of Lloyd's Register and MCA. Built with a robust steel hull and light aluminum superstructure, we worked with the most trusted specialists, consultants, and surveyors, using only the best equipment available. The result is a luxury yacht that can safely, efficiently, and comfortably cross the Atlantic while being operated by a relatively small crew.

SUN DECK

BRIDGE DECK

MAIN DECK

LOWER DECK

The innovative layout and luxurious interiors of C133 offer unsurpassed owner and guest experience, featuring accommodations and technical, crew, and social areas comparable to yachts easily over 45 meters in length.

The open saloon on the main deck features a comfortable lounging area and dining table for ten to twelve guests. Sliding doors on all three sides and lowering bulwarks provide unsurpassed views and connection to the sea. Further forward, the main deck offers a full-size galley, day head, and a starboard foyer connecting accommodations and common areas. The spectacular master cabin, located at the fore, spans across the whole width of the hull and is highlighted by port and starboard balconies. It features an office, a luxurious head with separate his and her vanities, as well as a spacious walk-in wardrobe.

Due to an innovate design and layout, the guest staterooms, located on the lower deck, can be transformed from four spacious double cabins for eight guests to two even larger VIP cabins for four guests with queen size beds. Double beds can be converted into twin beds, while one of the queen beds transforms into a sofa, allowing for further flexibility. All guest staterooms feature marble en suite heads, onyx furnishings, maximum sound and vibration control, and decoration of Europe's top design houses as on the rest of the yacht.

Abaft the upper deck is an intimate indoor sky lounge for entertainment and relaxation. It offers a full bar connected to the galley by a dumbwaiter, a cozy seating arrangement and an entertainment system with a sizeable television screen. Located further forward is the captain's double cabin, which directly links to the state-of-the-art helm station. A separate set of stairs from the wheelhouse leads directly to crew quarters and galley, providing maximum privacy for guests. Crew quarters offer three double cabins with bunk beds and en suite heads, a laundry room, and a crew mess for seven.

Like on the inside of C133, thought-out planning, creativity, and innovation, was key to maximizing the exterior space for functional entertaining and intimate lounging. Beginning at the aft garage, it transforms into a swim platform when opened, creating a beach club with secure access to the sea. The exterior aft main deck features a built-in u-shaped sofa arrangement surrounding a regulating table, which transforms from a low informal coffee table to a big dining for ten. The generous and shaded exterior aft lounge on the upper deck features a formal dining area, bar area with outdoor cooking amenities and settees for lounging and with entertainment system with television. While enormous sun deck features a fantastic massage Jacuzzi in form of an infinity pool for up to seven guests, providing panoramic views, built-in seating arrangements with elegant coffee tables, spectacular dry sauna and fitness zone and open aft areas for sun loungers. Finally a lovely lounging area on the bow of the yacht features two amazing sun beds - the perfect space for enjoying the ocean breeze when underway.

Conrad C133 is the result of applying Conrad Shipyard's winning formula, which is using the best global equipment and suppliers, best specialists and consultants, world-renowned designers and naval architects, in combination with Conrad Shipyard's world-class engineering team, design team, and craftsmanship. Sparing no effort, the Conrad C133 is ready to comfortably and safely convey you and your guests to the destination of your dreams.
